Dear Customer

### Amphenol Invotec Ltd RoHS Compliance

The Restriction of Hazardous Substances Legislation (RoHS 3), European Directive 2015/863, restricts the use of certain hazardous substances in electrical and electronic equipment (EEE).

The products supplied by Amphenol Invotec Ltd are components not defined as EEE and are therefore out of the scope of the regulations.

However, the components we manufacture (Printed Circuit Boards) are used in the manufacture of Electrical Equipment, it is recognised that knowledge of component parts is relevant and important to many of our Customers to meet future compliance obligations.

Amphenol Invotec Ltd shall endeavour to support the needs customer by offering products and information that will enable them to build RoHS Compliant Electrical Equipment.

We will maintain communication with our supply chain to enable us to continue to supply PCB's that are used in electrical equipment compliant with the directive.

We can confirm that none of our products contain:

- Cadmium and its compounds
- Hexavalent chromium and its compounds
- Mercury and its compounds
- Polybrominated biphenyls (PBB)
- Polybrominated diphenyl ethers (PBDE)
- Bis(2-Ethylhexyl) phthalate (DEHP)
- Benzyl butyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)

However, a considerable quantity of our products contains lead. The lead is present in the solderable coatings on the supplied PCB whenever a customer specifies Hot Air Solder level SnPb, or reflowed SnPb as a surface finish.

We shall not be making changes to any PCB that we manufacture unless requested by the customer, as the RoHS Directive does not specifically apply to our product and we are not always made aware of either application or market.

Tim Tatton  
General Manager
